

MODEL**ET**

HEAVY DUTY KNIFE GATE VALVE

The ET model knife gate is an uni-directional lug type valve designed according to MSS-SP-81 and TAPPI TIS 405-8 for industrial service applications. The design of the body and seat assures non-clogging shut off on suspended solids in industries such as:

- Pulp and Paper
- Power plants
- Mining
- Chemical plants
- Wastewater treatment plants
- Food and Beverage
- Etc.

Sizes: DN 50/2" to DN 900/36" (larger diameters on request)

Working pressure:

DN 50/2" to DN 600/24"	10 bar / 150 psi
DN 750/30"	7 bar / 100 psi
DN 900/36"	7 bar / 100 psi

Standard flange connection:

DIN PN 10 and ANSI B16.5 (class 150)
Other flange connections available on request

Directives: For EU Directives and other Certificates, please see the document: Directives and Certificates Compliance - Knife Gate Valves - Catalogues and Datasheets

All valves are tested prior to shipping in accordance with the standard developed by the Quality Control Department at ORBINOX.

STANDARD PARTS LIST

Part:	Stainless Steel:
1- Body	CF8M
2- Gate	AISI 316
3- Seat	Metal/Metal or EPDM
4- Packing	PTFE Impreg. Synth. Fibre with an EPDM O-Ring
5- Gland Follower	CF8M
6- Stem	Stainless Steel
7- Stem nut	Brass
8- Yoke	AISI 304 / Epoxy-coated Carbon Steel
9- Seat Retainer Ring	AISI 316
10- Handwheel	GJS400 (GGG40)
11- Cap	Plastic
12- Stem Protector	Epoxy-coated Carbon Steel
13- Friction Washer	Brass
14- Nut	Zinc Plated Carbon Steel

DESIGN FEATURES

BODY:

Lug type one piece integrally cast stainless steel body with reinforced ribs in larger diameters for extra body strength. Internal cast gate wedges and guides allows for tighter shutoff. Port design follows the MSS-SP-81 and Tappi TIS 405-8 standards.

The internal design of the valve avoids any build up of solids that would prevent the valve from closing.

GATE:

Standard AISI 316 stainless steel gate. The gates are polished and lapped to attain a greater seal between the gate and both the packing and the seat. The bottom of the gate edge is also machined to a bevel, so that it cuts through the solids for a tighter seal in the closed position.

SEAT: (resilient)

Unique design that mechanically locks the seal in the internal of the valve body with a stainless steel retainer ring. Standard EPDM also available in different materials such as Viton, PTFE, etc.

PACKING:

Long-life packing with several layers of PTFE impregnated fibre plus an EPDM O-ring, with an easy access packing gland ensuring a tight seal. Long-life braided packing is available in a wide range of materials.

STEM:

The standard stainless steel stem offers a long corrosion resistant life. For rising stem actuators only, a stem protector is provided for additional protection against dust while the valve in the open position.

ACTUATORS:

All actuators supplied by ORBINOX are interchangeable, and supplied with an standard mounting kit for installation purposes on site.

YOKE or ACTUATOR SUPPORT:

Made of stainless steel (EPOXY coated carbon steel available on request). Compact design makes it extremely robust even under the most severe conditions.

EPOXY COATING:

The epoxy coating on all ORBINOX cast iron and carbon steel valve bodies and components is electrostatically applied making the valves to be corrosion resistant with a high quality finished surface. The ORBINOX standard colour is RAL-5015 blue.

GATE SAFETY PROTECTION:

ORBINOX automated valves are provided with gate guards in accordance with EU Safety Standards. The design feature prevents any objects from being caught accidentally while the gate is moving.

OTHER OPTIONS

Bonnet (Fig.1):

Assures tight sealing to atmosphere.

Reduces packing maintenance.

V-port:

60 degree and pentagonal port design. Selection depends on the desired fluid control type.

Flush ports (Fig.2):

Allow for cleaning of solids trapped within the body cavities that can obstruct the flow or prevent the valve from closing. Depending on the process, purging can be made with air, steam, liquids, etc.

Other materials of construction:

Special alloys such as AISI 317 (1.4449), 254SMO (1.4544), Hastelloys, ...

Fabricated valves:

ORBINOX designs, produces and delivers special fabricated valves for special process conditions (big sizes and/or high pressures).

Fig.1

Fig.2

SURFACE TREATMENTS

Valve components can be protected or coated for a longer life expectancy, depending on the application of the valves and the valve service conditions. At ORBINOX we can offer alternative treatments and coatings for the different valve components to improve their properties against abrasion (Stellite, polyurethane...), against corrosion (Halar, Rilsan, galvanizing...) and against adherence (polishing, PTFE...).

We recommend to contact our technical department.

ACTUATOR TYPES

MANUAL:

- Handwheel (rising stem)
- Handwheel (non-rising stem)
- Chainwheel
- Lever
- Bevel Gear
- Other (square nut)

AUTOMATIC:

- Electric (rising & non-rising stem)
- Pneumatic (single & double-acting)
- Hydraulic

All actuators supplied by ORBINOX are interchangeable

FAIL SAFE SYSTEMS

Used on pneumatic actuated valves

SINGLE ACTING (SPRING RETURN)

- Available from DN 50mm/2" to DN 300mm/12"
- Supply pressure: min. 5 bar - max. 10 bar
- Options:
 - Pneumatic or electric fail open
 - Pneumatic or electric fail close
 - Other options on request

DOUBLE ACTING WITH AIR TANK

- Available for all valve sizes
- Supply pressure: min. 3.5 bar - max. 10 bar
- Options:
 - Pneumatic or electric fail open
 - Pneumatic or electric fail close
 - Other options on request

ACCESSORIES

- Mechanical stops
- Locking device
- Manual override
- Solenoid valves
- Positioners
- Limit switches
- Proximity switches
- Floor stands
- Stem extensions

Wide range of valve extensions available

For further information about fail safe systems and valve extensions, please see EX catalogue.

We recommend to contact our technical department

TEMPERATURE CHART

SEAT / SEALS

Material	Max.T (°C)	Applications
Metal/Metal	>250	High temp. / Low tightness
EPDM (E)	120	Acids and non mineral oil
NBR (N)	120	Resistance to petroleum products
FKM-FPM (V)	200	Chemical service /High temp.
VMQ (S)	250	Food service / High temp.
PTFE (T)	250	Corrosion resistance

PACKING

Material	Max.T (°C)	pH
PTFE impregn. synth. fibre (ST)	250	2-13
Braided PTFE (TH)	260	0-14
Graphited (GR)	600	0-14
Ceramic fibre (FC)	1200	--

NOTE: all types include an elastomere O-ring (same material as seal), excluding TH, GR and FC.

More details and other materials under request

SEAT TYPES

METAL / METAL

For applications with:

- High temperature
- High density media application
- When full tightness is not required

RESILIENT, TYPE "A"

- Standard resilient seat.
- Temperature limitations according to seat material selected. Review the above chart or contact our technical department for more information.
- Replaceable seat retainer ring.

RESILIENT, TYPE "B"

- Temperature limitations according to the selected seat material. Review the above chart or contact our Technical Department for more information.
- Replaceable and reinforced seat ring available in different materials such as: AISI 316 (1.4401), CA15, Ni Hard, etc.

DEFLECTION CONE "C"

- Deflects the media away from any valve internal exposed parts (gate, seat,...)
- Material: AISI 316 (1.4401), CA15, Ni-Hard, PU, etc.
- Face-to-face dimension increases:
DN 50 to DN 250 X = 9mm
DN 300 to DN 600 X = 12mm
Larger diameters on request

HANDWHEEL (rising stem)

- Standard manual actuator
- Consists of:
 - Handwheel: Epoxy coated Cast Iron
 - Yoke
 - Stem
 - Stem nut
 - Stem protector
- Available from DN 50/2" to DN 600/24"
- Options (on request):
 - Chainwheel
 - Non-rising stem
 - Locking Device
 - Extensions

GEAR

- Recommended for valves larger than DN 350/14" and working pressures greater than 3.5 bar / 50 psi

- Consists of:

- Stem
- Yoke
- Bevel Gear Actuator with Handwheel
(Standard Ratio 4:1)

- Available from DN 200/8" to DN 900/36"

- Options:

- Chainwheel
- Non-rising Stem
- Locking Device
- Extensions

PNEUMATIC CYLINDER

- The standard pneumatic actuator (double acting on-off cylinder) consists of:
 - $\varnothing \leq 300/12''$: Aluminum barrels
 - $\varnothing \geq 350/14''$: Composite barrels
 - Aluminum end covers
 - Stainless Steel (AISI 304) piston rod
 - Nitrile coated steel piston
- Available from DN 50/2" to DN 900/36"
- Supply Pressure: min. 3.5 bar / 50 psi - max. 10 bar / 145 psi. Actuator designed with 6 bar / 85 psi air supply.
- For valves installed in a horizontal position, we recommend U-type support plates and/or actuator support.
- Options:
 - Hard anodized barrel and covers
 - Stainless Steel barrel and covers
 - Over/Undersized cylinder
 - Manual override
 - Fail safe systems
 - Limit switches
- Instrumentation (on request):
 - Positioners
 - Solenoid valves
 - Flow regulators
 - Air preparation units

* For sizes DN 300/12" and above, actuator diameter may need to be oversized depending on the actual working pressure.

ELECTRIC ACTUATOR

- Consists of:
 - Electric actuator
 - Rising stem
 - Motor support yoke flange acc. to ISO 5210 / DIN 3338
- The standard electric motor is equipped with:
 - Manual emergency operation
 - Limit switches (open/closed)
 - Torque switches
- Available from DN 50 /2" to DN 900/36"
- Wide range of types and marks available to meet customer's needs.
- Option:
 - Non rising stem
